

INFRASTRUCTURE & DEPLOYMENT

Omnigo Production Deployment Plan

A practical, cost-conscious path to production — mobile app, backend, database, admin panel, and company presence, all mapped out.

1

VPS Hosts Everything

~\$10

Est. Monthly Start

\$25

One-Time Play Store

Prepared for management review

What We'll Cover

01

Mobile App Deployment

Google Play now, Apple App Store planned

03

Database Strategy

MongoDB Atlas today, self-hosting later

05

Domain, Email & Brand Presence

LinkedIn and Google Business Profile

02

Backend & Hosting

Why one VPS instead of scattered services

04

Admin Panel & Website

Both live on the same server — no extra cost

06

Cost Summary & Recommendation

What this actually costs to run

Mobile App Deployment

LIVE NOW

Android — Google Play

- ✓ **Cost:** \$25 one-time developer account
- ✓ **Distribution:** Publish unlimited Android apps globally
- ✓ **Updates:** Automatic, no manual reinstall for users

PLANNED

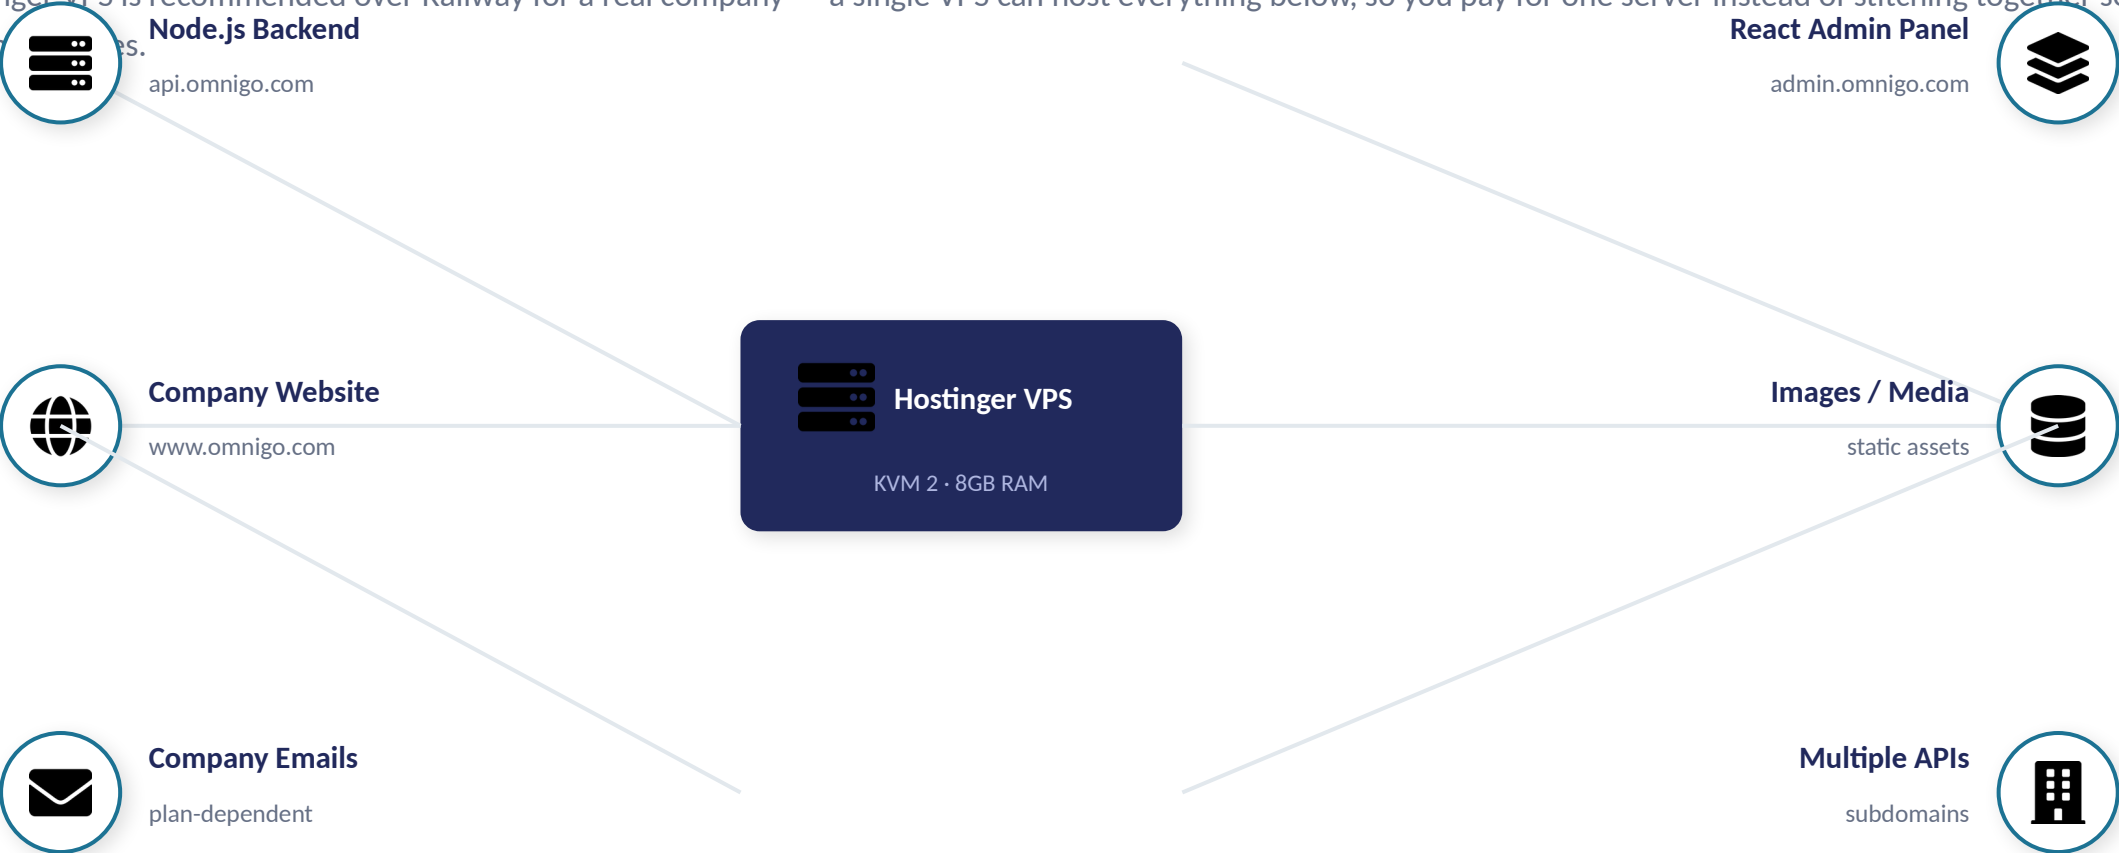

iOS — Apple App Store

- ✓ **Requirement:** Apple Developer Account
- ✓ **Cost:** \$99 per year (recurring)
- ✓ **Timing:** Recommended once Android traction is proven

Backend Hosting — One Server, Not Five Bills

Hostinger VPS is recommended over Railway for a real company — a single VPS can host everything below, so you pay for one server instead of stitching together several hosting services.

Hostinger VPS Plans

KVM 1

\$5-7 /mo

RAM

4 GB

vCPU

1 vCPU

SSD Storage

50 GB

RECOMMENDED

KVM 2

\$8-12 /mo

RAM

8 GB

vCPU

2 vCPU

SSD Storage

100 GB

Best balance of cost and capacity for a startup running backend + admin panel + website together.

KVM 4

\$15-20 /mo

RAM

16 GB

vCPU

4 vCPU

SSD Storage

200 GB

Omnigo · Production Deployment Plan

5

Database — MongoDB Atlas

Free Tier — Today

- ✓ ~512 MB storage
- ✓ Shared cluster
- ✓ Suitable for dev, demos, early testing
- ✓ No fixed expiration — usable indefinitely within limits

Upgrade when:

storage nears the limit · traffic increases · performance matters · you need backups & high availability

Self-Host on VPS — Later

As the company grows, move MongoDB onto the same VPS to cut recurring costs.

PROS

No separate Atlas bill
Full control

CONS

You own backups,
monitoring & maintenance

Recommendation: start with Atlas, evaluate self-hosting as usage grows.

Admin Panel & Company Website

Since the VPS is already running, both of these ride along at no extra hosting cost.

Admin Panel

admin.omnigo.com

React admin dashboard, hosted directly on the VPS alongside the backend.

\$0 EXTRA COST

Company Website

www.omnigo.com

Public-facing site for Omnigo, served from the same server.

\$0 EXTRA COST

Bottom line: one infrastructure bill covers backend, admin panel, and website — not three.

Domain & Company Email

Domain

Many Hostinger plans include one free domain for the first year (varies by plan).

omnigo.com or omnigo.pk

Example domain options

Renewal: ~\$10–20/year depending on TLD, after year one

Company Email

A VPS doesn't automatically include email — use the hosting provider's bundled option if available, or a dedicated email service.

- info@omnigo.com
- support@omnigo.com
- careers@omnigo.com
- admin@omnigo.com

Brand Presence — Free Channels

FREE

LinkedIn Company Page

- ✓ Publish company updates
- ✓ Post jobs (free & paid options)
- ✓ Showcase products & services
- ✓ Employees link their profile to Omnigo

Needs: logo, cover banner, description, industry, website, email, location

FREE

Google Business Profile

- ✓ Appears on Search & Maps
- ✓ Customers can leave reviews
- ✓ Shows hours, location & contact
- ✓ Improves local SEO & trust

Needs: business name, address, phone, verification (postcard/phone/email)

SECTION 06

Estimated Initial Monthly Cost

Hostinger VPS (8 GB)	\$8-12 / month
MongoDB Atlas	Free initially
Domain	Free year 1, then ~\$10-20/yr
Admin Panel Hosting	Included on VPS
Company Website	Included on VPS
Image Storage	Included on VPS
Company Email	Included if plan supports it
Google Business Profile	Free
LinkedIn Company Page	Free
Google Play Developer	\$25 one-time

Starting Monthly

~\$10-15

everything but the one-time Play Store fee

+ \$25 one-time
Google Play account

How We Roll This Out

NOW

Foundation

- ✓ Google Play account
- ✓ Hostinger KVM 2 VPS
- ✓ MongoDB Atlas free tier
- ✓ Backend + Admin Panel + Website live

NEXT 90 DAYS

Brand & Reach

- ✓ Domain + company email
- ✓ LinkedIn Company Page
- ✓ Google Business Profile
- ✓ Monitor VPS usage & traffic

WHEN IT MAKES SENSE

Scale Up

- ✓ Apple Developer account (iOS)
- ✓ Upgrade VPS tier if needed
- ✓ Evaluate self-hosted MongoDB
- ✓ Dedicated email platform if needed

Ready to Deploy

One VPS, one database plan, and two free brand channels — a lean, production-ready foundation for Omnigo.
